

# CASH DISPENSER

*Free branch ATM transactions*

*Provider your members with cash access, without paying ATM fees.*

## How does SwiftCash work?

The SwiftCash system allows Credit Unions to safely provide members with access to cash within a branch, without using the ATM network or visiting a teller.

The secure SwiftCash terminal is located in the branch, and connected into the Credit Union's TelephoneBanking System.

Members can then withdraw funds from their account by entering their Telephone Banking Access Code in much the same way they would use a conventional ATM.

This provides a number of benefits to Credit Unions and their members including:

- Simple low cost, self service solution.
- No transaction processing or ATM management fees.
- Increased service to members by providing fast and secure access to cash in the branch.
- Improved safety for branch staff by reducing access to cash.
- Provides dedicated access for members only.
- Familiar 'ATM' terminal interface ensures ease of use and high acceptance amongst members.

The SwiftCash system software has also been developed to ensure the highest security standards are maintained.

## The SwiftCash terminal

The SwiftCash hardware is based on "tried and tested" technology developed by NCR Corporation.

It features:

- Secure UL291 level 1 safe
- Large colour screen
- Two denomination dispenser (\$50 & \$20's)
- Tactile keyboard with 8 function display keys
- 40 column thermal printer

Dimensions of the SwiftCash terminal are:

- Height: 1465mm
- Depth: 688mm
- Width: 470mm
- Weight: 300kg

## Service and support

Banktech and Swift Call provide full maintenance and support services for the SwiftCash terminals, including help-desk, software support and responsive on-site maintenance.

A service agreement will be provided in conjunction with installation of each SwiftCash terminal. The SwiftCash system software has also been developed to ensure the highest security standards are maintained.

## BANKTECH

Banktech has been supplying ATMs and related technology to the Credit Union movement since 1991.

Banktech has built its reputation by providing a range of high quality terminals backed by responsive customer service.

## Swift Call

Swift Call was established in 1989, and since then the company has grown to be a leading developer of Interactive Voice Response (IVR), Internet Banking, Internet Banking Security, SMS, Business Banking, Cash Dispensers & Touch Screen Kiosks. Swift is your E-Banking specialist.
